

Monthly Staff Absence Report

*Who was genuinely, unexpectedly absent — and
nothing else.*

PREPARED FOR QBUTTON · UNITY ERP · HOURS
TRACKING

It counts the days that **actually matter** — not weekends, not public holidays, not the December shutdown.

The old report counted every calendar day with no hours as "absent," so weekends and holidays inflated the number by ~100 days a year. This report counts **working days only**.

Phase A reports **unclassified non-attendance** — it cannot yet tell approved leave from a no-show, so always reconcile before any payroll or disciplinary action.

What "working days" means

What the report actually counts

Weekends never count · the December shutdown is excluded like a holiday

Each person gets **15 leave days a year**, taken together over the **December shutdown** — so the shutdown is excluded like a holiday, and December doesn't show everyone as "absent."

Absence Reports
Track staff attendance and absences over time [Manage short time](#)

Report Period: Monthly Start Date: 01/03/2026 End Date: 31/03/2026

Staff Type: Active Staff Only Employment type: All types

Specific staff (optional):
☐ Ncebo
☐ Patrick Mtshibiliki
☐ Onke
☐ Jackson S'Thuli
☐ Lungile (Steel Section)
☐ Moses Kheswa

Leave empty to use the staff type scope.

Generate Absence Report

Go to **Hours Tracking** → **Reports** → **Absence Reports**. Pick **Monthly** (or any range), set the **dates**, choose a **Staff Type** (Active is the default), and optionally **Employment type** → **Monthly** or specific staff. Then **Generate Absence Report**.

> Batista Muvale Employment type not set Bradford pattern	22	0	22	100.0%	0	22
Bhekithemba Bane Employment type not set	0	0	0	0.0%	0	0
> Bradley Employment type not set worked public holiday Bradford pattern	22	21	1	4.5%	0	1
> Brandon Crook Employment type not set	22	21	1	4.5%	0	1

Working days in the period, Present, Unclassified non-attendance, Absence rate, Public holidays excluded, and the Bradford pattern score. The coloured Key at the top explains every flag.

The Key — four things that are *not* a plain absence

Unclassified non-attendance

A working day with no completed timecard.
Not yet leave vs. no-show — reconcile
before any payroll or disciplinary action.

Timecard exception

An incomplete clock record — clocked in,
never out. A data issue, not an absence.
Click the chip to fix the punches.

Worked a public holiday

Clocked in on a public holiday.
Never an absence — flagged so payroll
can apply double-time.

Short time

An employer-sanctioned reduced-work day.
An off day is classified short time;
a worked day still counts present.

Each shows as a coloured chip when you open a row. Only **unclassified non-attendance** counts toward the absence total.

3. Open a row — the weekday chips

Generate Absence Report

How to read this: counts working days only — weekends, public holidays and company closures are excluded. Company policy: 15 leave days/year.

● **Unclassified non-attendance** — a working day with no completed timecard. Not yet split into approved leave vs an unexplained no-show; reconcile before any payroll or disciplinary action.

● **Timecard exception** — an incomplete clock record (e.g. clocked in, never clocked out). A data issue, not an absence — excluded from the count until it's fixed.

● **Worked a public holiday** — clocked in on a public holiday. Not an absence — flagged so payroll can apply double-time.

● **Short time** — an employer-sanctioned reduced-work day. Not an unexplained absence; an off day is classified short time, a worked day still counts present.

An **amber** chip is an incomplete clock record (clocked in, never out) — a data issue, **not** an absence, so it's left out of the count. The pencil icon means it's clickable.

4. ...the clock-edit dialog opens right there

Clicking the chip opens the day's **clock record** — add the missing clock-out (or fix the punches), close, and the report refreshes. The exception clears once the timecard is complete.

Short Time

Record approved reduced-work date ranges for the whole factory or selected staff.

Add short time

Whole-factory rows apply to every staff member in the selected date range.

Scope

Whole factory

One entry with no staff member assigned.

Specific staff

Creates one entry per selected staff member.

Start date

16/03/2026

End date

18/03/2026

Note

Optional context for this short time period

+ Add Entry

Recorded short time

1 entries visible under current RLS.

Scope	Date range	Note	Actions
Whole factory	16/03/2026 to 18/03/2026	Factory short time — power interruption	Delete

From the report header, open **Manage short time** (`/staff/short-time`). Choose **Whole factory** or **specific staff**, set the **dates**, add a note, and **Add Entry**. Off days in that range become **short time**, not unexplained absence; worked days still count present. *(Admin only.)*

Counts working days only - excludes weekends, South African public holidays, and company closures. 'Unclassified non-attendance' is a working day with no completed timecard; it does not yet distinguish approved leave from an unplanned absence - reconcile before any payroll or disciplinary action. Company policy: 15 leave days/year.

Employee	Working	Present	Unclassified ab- sence	Rate	Pub. hol.	Bradford

Key

● Unclassified non-attendance — a working day with no completed timecard. Not yet split into approved leave vs an unexplained no-show; reconcile before any payroll or disciplinary action.

● Timecard exception — an incomplete clock record (e.g. clocked in, never clocked out). A data issue, not an absence — excluded from the count until it's fixed.

● Worked a public holiday — clocked in on a public holiday. Not an absence — flagged to payroll; an off day is classified short time, a worked day still counts present.

● Short time — an employer-sanctioned reduced-work day. Not an unexplained absence; an off day is classified short time, a worked day still counts present.

QButton - Absence report

Working days - Mon-Fri - public holidays - closures

Print / PDF gives a clean, dated document — company, period, scope, the full table with coloured detail, and the Key — ready to file or hand over. **Export to CSV** gives the same data for a spreadsheet.

Before you act on a number, read it correctly.

Unclassified non-attendance is *not* the same as an unauthorised absence — it simply means a working day with no completed timecard. Approved leave that isn't recorded yet still shows here.

Reconcile each flagged day against leave forms and short time **before** any payroll or disciplinary decision. Full leave-vs-no-show classification arrives in **Phase B**.

One number you can trust.

Working days in, weekends and holidays out — every flag explained, every day checkable.
